

Jerlin Lijo J

Software Engineer | Full Stack Developer (Angular & Node.js)

Bengaluru, India | +91 9500437135 | lijojerlin@gmail.com

LinkedIn: linkedin.com/in/jerlinlijo | GitHub: github.com/jerlinlijo

Professional Summary

I'm a **Full Stack Software Engineer** with over **3+ years of experience** building **scalable web applications** for **healthcare and enterprise environments**. I specialize in **Angular, Node.js, Express.js, SQL, and NoSQL databases**, with hands-on experience developing **EHR, LIS, and RIS systems**. I focus on writing **clean, maintainable, and well-structured code** while working closely with **cross-functional teams** to deliver **reliable and high-performance solutions**.

Technical Skills

Frontend Technologies - Angular, TypeScript, JavaScript (ES6+) - HTML5, CSS3, Angular Material - Reactive Forms, Dynamic UI Components

Backend Technologies - Node.js, Express.js - RESTful API Design & Integration - Authentication & Role-Based Access

Databases - MySQL, PostgreSQL, MongoDB - Database Design, Optimization & Indexing

Tools & Practices - Git, GitHub - Agile / Scrum Methodologies - MVC & Modular Architecture - Debugging, Code Review & Refactoring

Cloud & DevOps - Microsoft Azure (App Services, Deployment, Resource Management), AWS (EC2, S3, SQS, Lambda), Cloud Deployment & Infrastructure Management

Professional Experience

Software Engineer – Full Stack Developer

Advance Millennium Technology | Bengaluru, India

Jul 2025 – Present

- Developing and maintaining **enterprise-grade full-stack applications** using Angular, Node.js, Express.js, and PostgreSQL.

- Designing and implementing **RESTful APIs** with robust validation, structured error handling, and secure data flow.
 - Working with **complex data structures, UUID-based routing, and large-scale datasets** in production environments.
 - Building **reusable, scalable UI components** using Angular Material and Reactive Forms.
 - Optimizing backend performance and database queries using **Sequelize ORM**.
-

Software Engineer – Full Stack Developer

Triquetra Healthcare & Technology Pvt. Ltd. | Bengaluru, India

Dec 2022 – Jun 2025

- Led front-end development for **international healthcare projects** using Angular, delivering responsive and user-friendly interfaces.
 - Designed and maintained **MySQL database architectures** for Electronic Health Records (EHR), Laboratory Information Systems (LIS), and Radiology Information Systems (RIS).
 - Developed **reusable Angular components and shared services**, improving development efficiency and consistency across multiple projects.
 - Built and integrated **RESTful APIs** using Node.js and Express.js, ensuring secure and efficient communication between frontend and backend systems.
 - Implemented **real-time data synchronization** using WebSockets for live healthcare data updates.
 - Performed **code reviews, debugging, and performance optimization**, improving application stability and reliability.
 - Mentored junior developers, providing guidance on best practices, code standards, and development workflows.
-

Education

Bachelor of Technology (B.Tech) – Computer Science Engineering

Karunya Institute of Technology and Sciences

Jul 2019 – May 2023

- Built a strong foundation in **Software Development Life Cycle (SDLC)** and system design.
 - Worked on computational and software models during academic projects.
-
